

Would you be willing to help?

Dr. Munavalli has been selected to participate in a research study to test a new procedure that may be beneficial in lightening spots on the skin.

If you are an adult with benign pigmented lesions (sun spots, freckles, melasma, moles or café au lait spots) who is willing to help in the development of this new procedure, you may be eligible to participate in this study.

A modest compensation will be provided to participants for the treatment visit and each follow-up visit. Please email or call the number below to find out if you may be eligible:
