

Gilly S. Munavalli, MD, MHS, FAAD

Dermatology Laser and
Vein Specialists of the Carolinas
Charlotte, North Carolina

ASK DR. MUNAVALLI

WHAT COSMETIC PROCEDURES DO YOUR PATIENTS DEMAND THE MOST?

For noninvasive rejuvenation patients, Botox® and fillers are greatly demanded. We tailor fillers to meet the needs of every patient. The results are dramatic without downtime. Patients also demand skin resurfacing, where we use the latest lasers to remove sun-damaged skin and wrinkles. The outcomes are dramatic and help restore the radiantly beautiful young skin closer to what our patients had decades ago.

WHAT PROCEDURES GRATIFY YOU THE MOST?

Personally, I am gratified when a procedure that I perform changes a life. Sometimes it is a cosmetic procedure that helps my patients feel better and more confident. Other times it is Mohs surgery, where we remove skin cancers and reconstruct the skin to restore a natural appearance.

WHAT IS YOUR CORE TREATMENT PHILOSOPHY?

At DLVS our patients always come first. For me, listening to my patients is most important. All our surgical treatments are always performed by a dermatologist. I believe in always being available and accessible to my patients for ongoing care.

WHAT SETS YOUR PRACTICE APART?

DLVS is one of the fastest growing centers of clinical research on the skin, allowing our patients a sneak-peek into the latest scientifically proven cosmetic treatments. We are a large referral practice for vein surgery and venous disease, seeing patients from all over the region.

The hottest new procedures

Facial volume enhancement: LaViv™, the first FDA-approved cellular therapy for facial wrinkles has finally arrived! LaViv allows the growing, enhancing and re-injecting of one's own collagen-producing cells (fibroblasts) into facial areas to correct folds, lines and acne scars, for long-lasting results. Dr. Munavalli has worked with LaViv from its earliest clinical trials and has five years of experience injecting it. "LaViv is a real breakthrough for naturally improving the aging face," says Dr. Munavalli.

Body Contouring: CoolSculpting® is now mainstream! With more than 1,000 successful treatments, Dr. Munavalli and his patients are thrilled with the results on stubborn fat. He continues to recommend this noninvasive method for reducing unwanted bulges in the abdominal area, flanks and back.

OFF-LABEL TACTICS

QUICK FIXES WITH FILLERS

Dramatic improvements can be realized when we target under-eye hollows with dermal fillers, such as Restylane®, off-label. Mid-face descent is beautifully counteracted with Radiesse® for cheek enhancement and redefining the jaw line with Juvéderm®, both of which are also performed off-label. Subtlety is critical. Although these are temporary fillers, they last from months to more than a year in some instances, depending on the filler.

“subtlety is key to restoring natural youthfulness”

DR. GILLY S. MUNAVALLI IS A NATIONALLY RENOWNED DERMATOLOGIST, RESEARCHER AND CLINICAL INVESTIGATOR FOR MEDICAL AND COSMETIC DERMATOLOGY. ABOUT DR. MUNAVALLI

WHAT ARE YOU MOST PASSIONATE ABOUT?

I like offering my patients the most advanced technologies and treatments and being involved in the clinical research that develops them.

WHY DID YOU CHOOSE DERMATOLOGY?

I love that I can cosmetically enhance the appearance of the skin while also being able to perform life-changing medical procedures, such as removal of skin cancers and varicose veins.

HOW DOES YOUR STAFF ENHANCE THE PATIENT EXPERIENCE?

My staff is my most valuable resource. They are highly trained, extremely caring and very professional. It is their knowledge and dedication to patient care that makes us who we are.
